

LP Sterox

Product Code: 56609

- Effective against legionella & pseudomonas
- Kills bacteria and algae
- Non-foaming
- Compatible with other cooling tower chemicals
- Penetrates and removes biofilm
- No neutralisation required in disinfecting tank

LP Sterox is a highly effective disinfectant for use against Legionella, pseudomonas, bacteria and algae, as well as the removal of biofilm. Ideal for disinfecting stored water systems in all domestic or commercial properties, LP Sterox is easy to use, with no need to flush out or neutralise the system.

Physical Properties/Specification

Form: Liquid
Colour: Colourless
Odour: None
pH (conc.): 4.0
pH (in-use): 6.5-7.5
SG: 1.01 at 20 °C

Application

One bottle will disinfect a 300 litre system during normal use, or 400 litres if the system is not used for 24 hours after application. It is not recommended to exceed this dosage rate.

For drinking water systems, a full flush is recommended after disinfection to remove any dislodged biofilms before consumption.

Test strips are available for monitoring hydrogen peroxide as follows:

At the recommended dosage rate, 1 litre contains 100 ppm in-use hydrogen peroxide (0.30% LP Sterox in solution) – this is the required dosage rate for legionella control.

For further information on treating legionella, consult BS EN 8580, ACoP L8, HSG274 and HSG282.

Packaging, Handling and Storage

LP Sterox is supplied in 1 L bottles.

LP Sterox is classified as non-hazardous for human health, but as with all chemicals keep out of reach of children. In case of contact with eyes or skin, rinse immediately with plenty of water.
